

**The 2023 Connecticut STEM Fair on Saturday February 4th and 11th
will now be held virtually via Zoom.**

This message is being sent to everyone who received my earlier message about judging a Science Fair at King School in Stamford. **We plan the Fair online will allay health concerns expressed by several potential judges.**

Individuals with a background in one of the sciences, engineering or mathematics are needed to serve as judges for the 23rd Annual Connecticut Science, Technology and Engineering Fair (CTSTEM Fair). We wanted to create Zoom judging sessions as we feel the feedback from live interaction is the main benefit of the CT-STEM fair. We are planning on splitting the judging into two weekends. Completed Projects Saturday, February 4, 2023. 9am to 1pm and Project Proposals Saturday, February 11, 2023. 11am to 3pm.

What does being a judge involve?

- Judging exhibits submitted by area high school students. Exhibit topics are in the areas Life Sciences, Physical Sciences, or Engineering.
- Judges will be able to access their assigned projects online, and will be able to download a judging form to complete and return to CTSTEM.

There will be about 200 student exhibits from several area high schools.

To register to judge contact the following website link:

https://ctstem.stemwizard.com/public_site/judge_register

Please also fill out the the time slot form so we know your availability.

<https://forms.gle/m8A5sTPG6pgzhShu6>

Also, please forward this invitation to colleagues and friends whom you feel would be good judges and encourage them to volunteer.

Additional information will be provided to all registered judges as it becomes available. Prior to February 4 judges will know which exhibits are assigned to them and will be able to review the abstracts and poster online.

I look forward to hearing from you! Thank you for your support.

Fran Walker Lichtenberg
Member, Board of Directors, Connecticut STEM Foundation
And Chair of Judges
